TECHNICAL SKILLS

HTML CSS React
TypeScript Tailwind CSS
Python PostgreSQL
Java C# XML
React Native AWS EC2
Block Box Testing
Responsive Design
REST APIs

MINI PROJECTS

- Expense Tracker
- QR Automation System
- DOC Management System
- Winforms Billing Software

EDUCATION

2023 – 2027

Nandha Engineering College

B.Tech – Artificial Intelligence & Data Science

ABOUT

Detail-oriented front-end developer experienced in building responsive and user-friendly web applications using HTML, CSS, Tailwind CSS, React, and TypeScript. Skilled in creating clean interfaces and responsive layouts that deliver smooth user experiences across devices. Strong understanding of UI/UX principles, API integration, and modern full stack development practices. Focused on writing clean, maintainable code while continuously learning and improving development skills.

EXPERIENCE

INTERN · AST TECHNOLOGY, SALEM

Turf Booking Web App

JUL 2025

- Built a responsive frontend using React & TypeScript, ensuring cross-device usability and accessibility.

Gym Management System

OCT 2025

- Built a responsive and accessible frontend using React & TypeScript for consistent cross-device experience.

AC Waiting Hall Booking System

NOV 2025

(Railway Junction)

- Developed a role-based AC waiting hall booking system (Admin) using React, TypeScript & Tailwind with worker module built using XML.
- Implemented real-time seat allocation, booking validation, and efficient record management.

Parking Management System

FEB 2026

(QR Based)

- Developed a QR-based parking system using React Native with role-based access.
- Built mobile apps and a React dashboard with real-time tracking via QR scanning.
- Implemented C# APIs and deployed on AWS EC2 with secure authentication.

BCON Architecture Web App

MAR 2026

- Built a responsive company website using React to showcase services, projects, and contact details.
- Improved user experience with clean UI design and optimized performance across devices.

Planora (Event Management System)

MAR 2026

- Developed with role-based access (Admin & Coordinator) using React and backend APIs.
- Implemented event creation, program management, and real-time data handling.

Plant Disease Detection

APR 2025

(AI / Deep Learning)

- Built a CNN-based classification model to detect plant leaf diseases from images.
- Applied computer vision and deep learning using Python and TensorFlow.

Luggage Management System

JAN 2026

- Developed a luggage management system with worker module using XML.
- Implemented real-time tracking and efficient record management.
